

Multipoint Safety Check

All our approved cars have a multipoint mechanical & safety check.

Our technicians inspect the mechanical aspects of the car, from the oil levels to the condition of the brake pads. We also make sure that safety-related items, such as seat belts and airbags, are in full working order. And, if needed, the cars are repaired so they're safe to drive, reliable and meet UK MOT standards.

The details of what we repair are explained below so you can buy with confidence.

What's Included

If not in full working order, the following will be fixed or replaced:

Washer System

- Washer jets
- Front and rear wiper blades.
- Headlight washer (if applicable)
